Landscape Design

Good landscape planning will develop into a beautiful, easy to maintain yard. Farmyard design should concentrate on back three outside rows around the yard then designate areas for garden, fruit trees and small recreational area with selections of shade trees and shrubbery around the house. In urban settings, planting can vary from cluster planting to planting around the edge in back, utilizing space while adding beauty and colour. We can help with suggestions or with a professional landscaping service. Please feel free to inquire about prices on farms, parks, urban or just a partial yard.

Landscape Design Service.....\$65.00

Guarantee

As we understand that some plants have problems we offer warranty coverage for plants that have problems that originated in our care, such as not coming out of dormancy. This should be evident within 30 days from date of purchase. If plants are not growing please call us as we are here to help. We DO NOT warranty healthy plants leaving our care. Plant survival depends on how they are cared for to get established. Improper planting, lack of or too late watering as well as winter damage is out of our control. Plants that we do not cover are azaleas, clematis, hedging, perennials, seedlings, strawberries and tender roses.

Gift Certificates

For special occasions, please feel free to inquire about our gift certificates which can be redeemed at your gardener's convenience.

Location

We are located in the Pleasantdale District, 2 miles East on Hwy 6 on the Pleasantdale grid and 2.25 miles North. Just follow the signs.

Perennials

Perennials can provide a total range of colour, fragrance and brilliance in large beds or used as accents. Borders along walks, around pools, patios or foundations can be designed to provide variety in height, foliage, colour and time of blooming. Perennial flowers die down each fall but come back the following spring, requiring little attention. For the best selection come by in early spring.

Small Fruit

4500AMW

ASPARAGUS MARY WASHINGTON

An old favourite, with a vigorous growth habit, producing tender green spears with slight purple overcast and compact heads with excellent flavour. Harvest in early spring.

Ht 90cm-3' Sp 60cm-3' Z3

4.5" – \$2.00

4505BC

BLUEBERRY CHIPPEWA – Vaccinium

Hardy, upright, self-pollinating variety with large berries ripening earlier than other varieties. Sweet flavoured fruit in mid-summer. Prefers moist, acidic soil.

Ht 90cm-3' Sp 90cm-3' Z3

1 gal. – \$18.00

4510BNB

BLUEBERRY NORTHBLUE – Vaccinium

Dwarf, self-fertile plant with white blooms in spring and glossy foliage which turns red in fall. Large, dark, mid-season blueberries have superior processed flavour. Prefers moist, acidic soil.

Ht 90cm-3' Sp 90cm-3' Z3

1 gal. – \$18.00

4515BC

BLUEBERRY NORTHCOUNTRY – Vaccinium

White blooms in spring and glossy green foliage which turns red in fall. Late season blueberry produces acidic soil.

Ht 90cm-3' Sp 90cm-3' Z3

1 gal. – \$18.00

4520BNS

BLUEBERRY NORTHSKY – Vaccinium

White blooms in spring and glossy green foliage turning red in fall. Hardy cultivar with small to medium sized sweet, mid-season blueberries. Prefers moist, acidic soil.

Ht 90cm-3' Sp 90cm-3' Z3

1 gal. – \$18.00

4525BSC

BLUEBERRY ST.CLOUD – Vaccinium

Heavily productive variety with more upright habit and medium sized berries ripening earlier than others. Superior firmness and flavour for fresh eating. Requires another cultivar for pollination and moist acidic soil.

Ht 90cm-3' Sp 90cm-3' Z3

1 gal. – \$18.00

Small Fruit

4530CCJ

CHERRY SK CARMIN JEWEL – Prunus x kerrasis (U of S)

A dwarf sour cherry is a low suckering shrub form. Fruit skin & flesh color are dark red. Average size and cold hardy. Harvest in July or August. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z2

1 gal. – \$18.00

4535CCP

CHERRY CRIMSON PASSION – Prunus x kerrasis (U of S)

The fruit is very dark red rounded to slightly cordate and large. The flesh is very good quality with the highest sugar content of all the U of S cultivars. It is excellent for fresh eating & good for juicing. Harvest in early to mid-August. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z3

1 gal. – \$18.00

4540CC

CHERRY CUPID – Prunus x kerrasis (U of S)

Blooms a week earlier than the other cherries. Few suckers. It matures in late August. The fruit is very dark red to near black and is the largest fruit obtained to date. It has excellent flavour. Good for fresh eating and processing. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z2

1 gal. – \$18.00

4545CJ

CHERRY JULIETTE – Prunus x kerrasis (U of S)

The dark red fruit is rounded and medium in size. The flesh is excellent quality, with high sugar content. Excellent for fresh eating and processing. Ripens in mid August. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z2

1 gal. – \$18.00

4550CR

CHERRY ROMEO – Prunus x kerrasis (U of S)

The fruit is dark red to nearly black at maturity. Medium in size. Very flavourful – good for fresh eating and processing. Harvest in late August to early September. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z2

1 gal. – \$18.00

4555CV

CHERRY VALENTINE – Prunus x kerrasis (U of S)

The fruit is medium bright red in colour and medium size. Produces large crops. A little too tart for fresh eating but good for processing. Harvest in early to mid August. No pollinator required.

Ht 2.5m-8' Sp 2m-6' Z2

1 gal. – \$18.00

Small Fruit

4560CE

CHERRY EVENS – Prunus

Fruit is bright red cherry with translucent flesh. Fruit can be left on tree well into September. Self-pollinating. Harvest in July-August.

Ht 4m-13' Sp 3m-10' Z3

1 gal. – \$18.00

4565CM

CHERRY MONGOLIAN – Prunus fruticosa

White flowers, dark shiny leaves and 1/2" red cherries. Early flowering. Use for juice or jelly. Harvest in August.

Ht 90cm-3' Sp 90cm3' Z3
